Latest TD Scan Software Version 17.03

Here's to a Successful 2008!

As 2007 seems a distant memory to most of us by now I would like to take this opportunity to thank all of our customers and representatives for what turned out to be a record breaking year for our company. It goes without saying that my thanks also lies a bit closer to home in thanking the AGR Technology Design team for all their hard work and efforts that saw us meeting our customer demands and with their full support and vision took the business to the next level. 2008 will see this service increase as we welcome more staff such as John Kendrick (Production Manager) and Jon Cunningham (Electronics Technician) to the team. Our aim is to continue to move the business forward and increase our commitment to customer service, support to our agents and continuing the ability to offer leading edge products and services to our customers. This goal will only be achieved with the support of all including our ever expanding customer base for which I would like to thank you in advance for your continued support of our company and belief in the products that we develop and manufacture.

Nothing remains more for me to say apart from I wish you a very healthy and successful 2008

Mark Clark

General Manager –AGR Field Operations Manchester

Distributor News : NDE 2007– Modsonic Instruments wins ‘Best Exhibitor Award’

AGR’s Indian distributor ‘Modsonic Instruments’ participated at the annual event **NDE2007** conducted by the 'Indian Society for Non-destructive Testing'.

The event which took place from 28 to 30 November, 2007 in Vadodara was attended by 500 delegates and 58 companies from all over the world exhibited their products.

Modsonic displayed **TD Pocket-Scan**, **TD Focus-Scan** and the latest phased array instrument the **TD Handy-Scan** which generated significant interest amongst the delegates.

Modsonic received the ‘Best Exhibitor Award’. The criteria included: the number of products on display, the technical capabilities of the staff providing accurate and informative information about the product range, and of course the aesthetic appeal of the booth

Modsonic’s booth drew in the crowds at the NDE2007 Conference

Tip of the month

When using a **TD Handy-Scan** try using the grey/white shortcut buttons on the left-hand side. To get a visual clue to the use of each button press the orange **Menu On/Off** button but **remember** the shortcut buttons have different functions online and offline.

Exhibition News

IV Pan American Conference for NDT- Buenos Aires

October 22nd -26th 2007

There is no rest for the wicked! Straight from the successful HSNDT exhibition Crete, Jackie Berry, Sales Manager for AGR Field Operations flew to Buenos Aires, Argentina for the IV Pan American Conference held at the Panamericano Buenos Aires Hotel. AGR were present in a supporting role for our Brazilian Distributor – InnoTech based in Sao Paulo, Brazil. The exhibition was well attended by delegates coming from around the globe to see the latest cutting edge technologies.

Jackie Berry comments ‘ This is a relatively new venture for AGR in Brazil. The exhibition alongside Innotech proved to be a great success and we are looking forward to future projects.

ASNT Fall Conference – Las Vegas, USA

November 12th – 15th, 2007

After another busy year of shows, conferences and demonstrations AGR Field Operations found its self in the heart of the Nevada desert for their final show of 2007. The American Society for Non destructive testing held its popular fall conference at the Riviera Hotel, Las Vegas. AGR shared a booth with our American distributor, Mechanical Integrity Inc and was well manned by both teams to cover the large amount of visitors we had to discuss the systems and their technical capabilities.

The conference was well attended by all areas within the NDT arena

Both Mark Clark and Jackie Berry were in attendance on behalf of AGR to promote their range of ultrasonic technologies which also included giving a presentation to all the U.S. distributors. The evening was deemed as a great success by all and provided an exchange of ideas and feedback.

Overall the conference and the distributor meeting were very successful and using this as a platform to build the business we are confident we will remain one of the leaders in advanced ultrasonic products and services in the coming years.
