

EXHIBITION NEWS Successful Spanish Seminar

AGR Field Operations, 'Ultrasonic Technologies' division based in Winsford Cheshire has for the past twelve months been following a policy of 'taking knowledge to the people' by participating in seminars and open days in various locations around the world. The **Institut Químic De Sarrià (IQS)** in Barcelona which is one of the most prestigious universities in Spain was the latest venue for an exciting gathering of representatives from local NDT companies and industries interested in innovative inspection technologies and products during March. The 'Ultrasonic Technologies' division delivered technical and sales presentations attended by more than 100 delegates representing 48 different organisations.

Organised by Setelisonic, a leading Spanish NDT solution provider and distributor of AGR's range of advanced ultrasonic systems and other NDT products, the three day seminar was successful beyond expectation. Each of Setelisonic's suppliers were allocated a day to showcase their products and technological specialities. The first day was dedicated to AGR and Mark Nel presented talks on Time of Flight Diffraction, ultrasonic Phased Array and the various products manufactured by AGR. Jackie Berry Sales Manager for 'Ultrasonic Technologies' was on hand to answer any commercial questions.

"The feedback from the seminar was overwhelmingly positive, many delegates brought samples which were tested by NDT experts, this meant that seminars were not only theoretical, the practical aspect was also really useful" comments Sales Manager at Setelisonic Gerard Rafart. There was much interest in AGR's newly released TD Handy-Scan system. Following the seminar AGR and Setelisonic are currently in discussions with several companies in different industry sectors for the supply of systems throughout Spain.

The TD Handy-Scan bridges the gap between the powerful TD Focus-Scan with its multi-featured design and the growing demand for simple, inexpensive and highly portable Phased Array/ToFD instruments for routine field work. One delegate commented, "The introduction of a system that is capable of collecting phased array and ToFD data simultaneously *and* with all the analysis tools present as well is very interesting to my company in Spain and other offices in neighbouring countries."

NDT Seminar

Due to the success of the seminar in Barcelona, AGRTD are back to Spain to hold an NDT seminar with Setelisonic in Madrid next week. The seminar will be held at the **AEND (Asociación Española de Ensayos no Destructivos)** on **Tuesday 12th & Wednesdays 13th June.**

For more details and an invitation please see overleaf.

TIP OF THE MONTH

Did you know that Corrosion Mapping using a video camera can be carried out using any of our instruments; **TD Pocket-Scan, TD Scan, TD Focus-Scan & TD Handy-Scan.** All you need is the Pulse Echo software and our **Corrosion Mapping Kit.**

Leading the field in Multi Function Ultrasonic & Phased array inspection Systems

Please print off this ticket and present it on arrival. Thank you.

INVITATION

NDT SEMINAR: AGR TECHNOLOGY DESIGN LTD & SETELISONIC

You are invited to a presentation and demonstration of the specialities of conventional Ultrasonics, Phased Array, Eddy Current and Bond Testing.

Date: Tuesday 12th & Wednesday 13th June 2007

Venue: AEND (Asociación Española de Ensayos no Destructivos) facilities,
28th Bocángel Street, 2^o left 28029 Madrid. Spain

Session 1: 10h –13h

Session 2: 16h-19h

UK: jackie.berry@agr.com

Spain: sales@setelisonic.com
